

## Leave No Trace Seven Principles

**PLAN AHEAD AND PREPARE** | Learn about the distance and terrain to the waterfall you plan to visit. Choose equipment and clothing for comfort and safety. Be sure to check the weather prior to traveling to the waterfall trailhead.

**TRAVEL & CAMP ON DURABLE SURFACES** | To reduce erosion and ecosystem damage, stay on the maintained trail as you hike to each waterfall and try to walk only on rock and gravel while exploring your destination. Camp only at designated campsites.

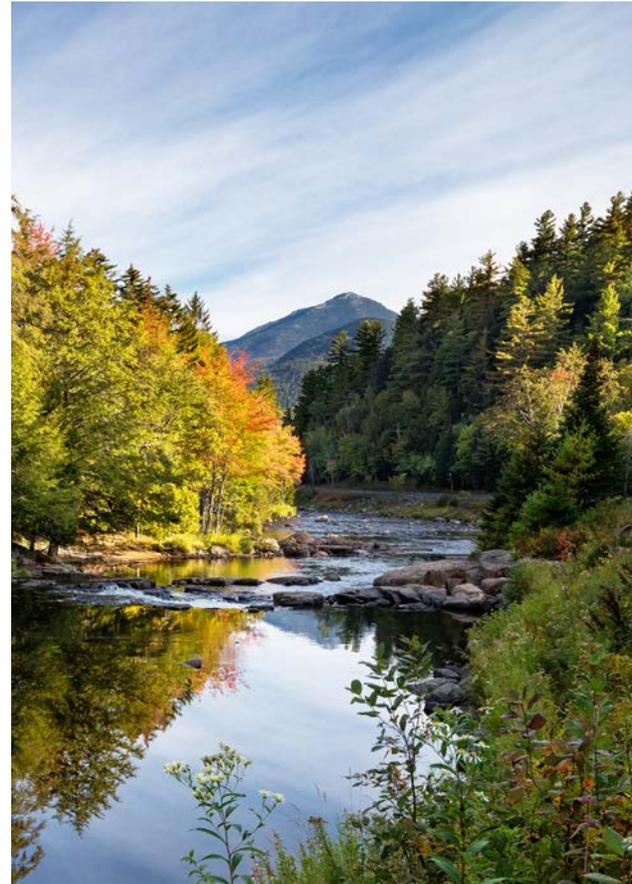

**DISPOSE OF WASTE PROPERLY** | Carry out everything that you carry in with you – including toilet paper. Consider bringing a small trash bag to pick up other people's trash. If you have to go the bathroom, please do so 200 ft or 70 big steps from trails and waterfalls.

**LEAVE WHAT YOU FIND** | Avoid damaging live trees and plants and leave all natural objects, such as pinecones and rocks, where you find them. Leave lean-to's, trail registers, and permanent campfire rings clean and in good condition.

**MINIMIZE CAMPFIRE IMPACTS** | Only build fires in established campfire rings at designated backcountry campsites, only use campfire wood that is dead and down on the ground, and completely drown your campfire with water before you leave.

**RESPECT WILDLIFE** | Observe wildlife from a distance so they are not scared and forced to flee. To protect yourself and to reduce stress to the wildlife you encounter, do not touch, feed, or get close to any wild animals.

**BE CONSIDERATE OF OTHERS** | Please yield to hikers walking uphill on the hiking trail. Many visitors come to these trails to experience the beauty and sounds of nature, excessive noise, uncontrolled pets, and damage to surroundings reduce the value of other's experiences.

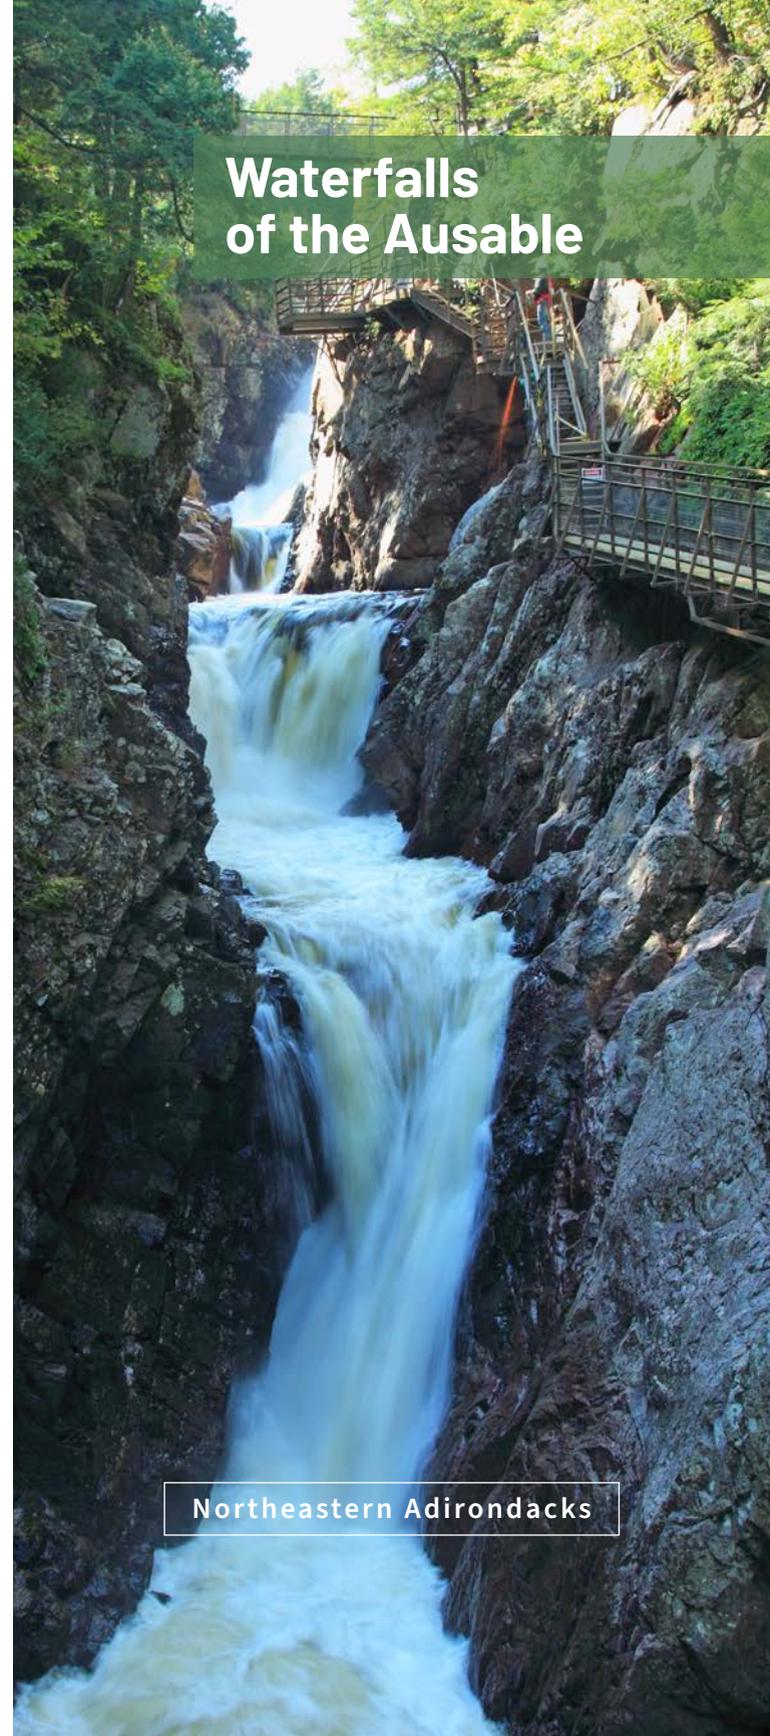

Since 1998, the Ausable River Association has protected our streams and lakes, their water quality, and the many forms of life that depend on them.

## Waterfalls of the Ausable

Northeastern Adirondacks

## Adirondack Mountain Reserve

Since 1887, the headwaters of the East Branch Ausable River, its mountains, forests, and wildlife, have been protected under the private ownership of the Adirondack Mountain Reserve (AMR), home of the historic Ausable Club. While saving this delicate ecological zone from timbering, mining, and development, the AMR donated an easement granting limited public access. For visitor safety, for trail and ecosystem preservation, and for protection of the wilderness experience and these waterfalls, the AMR retained the right to restrict access as needed to preserve the natural and aesthetic resources of the reserve and prevent overuse. Unlimited access, off-trail travel, hunting, fishing, rock or ice climbing, swimming, and camping are prohibited. Through a program run by the AMR in partnership with the State of New York, visiting Rainbow or Beaver Meadow Falls requires reservations from hikeamr.org from May 1st to October 31st, 2022.

## Discover the many spectacular waterfalls of the Northeastern Adirondacks located in the Ausable Watershed.

From stunning waterfalls in the Adirondack Mountain Reserve to smaller roadside cascades, you will love each of these waterfalls! This guide features some of the most popular waterfalls the area has to offer.

### 3 Indian Falls

Waterfall type: 25 ft free fall  
 Total Distance: 9 miles  
 Maximum elevation gain/loss: 1,600 ft  
 Trail difficulty: Difficult  
 Parking coordinates: 44.183016, -73.964047  
 Parking lot fee required year-round. Beautiful view of MacIntyre Range from top of falls.

PHOTO: Allan Beaufour

### 4 Bushnell Falls

Waterfall type: 20 ft free fall  
 Total Distance: 10 miles  
 Maximum elevation gain/loss: 1,300 ft  
 Trail difficulty: Difficult  
 Parking coordinates: 44.189097, -73.815833 (late fall through late spring), 44.218216, -73.789230 (early summer through early fall)  
 Parking lot fee required year-round. Hiker shuttle early summer through early fall.
